Note: Avoid inline styling, Use TS lint VS code extension for indentation

## Task 2

Title: Cricket score board app

Description: Create a basic cricket score board app with good UX with the below info

1. Total score / wickets (154 / 2)
2. Ongoing over / Total overs (18.4 / 20)
3. Current batters in crease with score (Click on a batter should take to person's stats page)
4. Calculate run rate of the score

Note: Adding a ball & run should calculate score, run rate, current over

Mock UX: Should come up with innovative UX

Web Technologies to be used:

HTML, CSS, Javascript, jQuery, or any JS framework (Angular, React, Vue,...)

Code Editor:

VS Code

Note: Avoid inline styling, Use TS lint VS code extension for indentation
